FeeAudit — guide

Amazon & Walmart Marketplace fee discrepancy checker: flags possible overcharges and lists items to review.

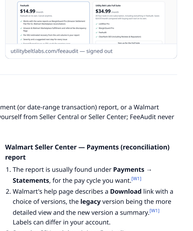

Screenshots captured signed out from the live (utilitybeltlabs.com, build `4247775`) on Oct 29, 2026, using only the synthetic sample data the site ships with.

1 What it does and who it's for

FeeAudit is a fee discrepancy checker for Amazon (FBA) and Walmart Marketplace (WFS) sellers. Drop in a settlement or reconciliation report and it flags fulfillment and referral fees that look too high or jumped suddenly, estimates what may be recoverable per SKU, rates each issue high / medium / low, and suggests a next step.

It runs in your browser: the report is processed on your device and never uploaded. It uses exactly the same files as MarginGuard Pro.

Who it's for: sellers who want a quick, private check for fees worth a closer look before opening a case — not a guaranteed refund service.

2 Get the right report

FeeAudit reads the same two kinds of file: an Amazon settlement (or date-range transaction) report, or a Walmart Marketplace payments / reconciliation report. Download it yourself from Seller Central or Seller Center; FeeAudit never connects to your marketplace account.

Amazon Seller Central — settlement report (Flat File V2)

1. Open the **All Statements** page of the Payments report (legacy Seller Central) or **Finance Report** (new Seller Central).[A1]
2. Optionally narrow the list with **Select Date Range**.[A1]
3. In the **Actions** column of the settlement period you want, click **Download Flat File V2**.[A1]
4. Save the file; it's a text report you can drop straight into FeeAudit.

Amazon — custom date range instead

1. **Payments → Reports Repository**.[A2]
2. Choose **Month** or **Custom date range** (up to 365 days) and click **Request report**; it can take up to three hours.[A2]

Walmart Seller Center — Payments (reconciliation) report

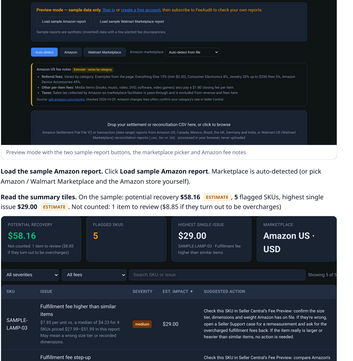

1. The report is usually found under **Payments → Statements**, for the pay cycle you want.[W1]
2. Walmart's help page describes a **Download** link with a choice of formats; the **legacy** version has the more detailed view and the new version a summary.[W1]
   Labels can differ in your account.
3. Save the CSV and drop it into FeeAudit.

Check your report includes per-item rows (SKU plus amounts) before relying on the results. We haven't confirmed which Walmart download Seller Central/Seller Center report matches best; the shipped Walmart sample uses a line-per-amount layout like the detailed report. Try your file and check the "Loaded…" message.

Supported Amazon stores for the site: US, Canada, Mexico, Brazil, UK, Germany and India (localized headers, decimal commas and local date formats). Walmart: US only.

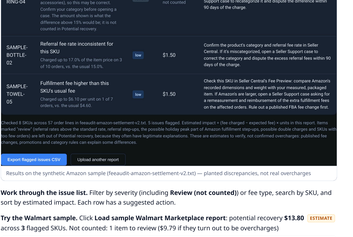

3 Walkthrough on the sample reports

1. **Open the checker.** Go to utilitybeltlabs.com/feeaudit (the tool itself is at `/feeaudit-app/`). Signed out, you're in **preview mode**: you can run the synthetic sample reports; checking your own report and exporting need a subscription.

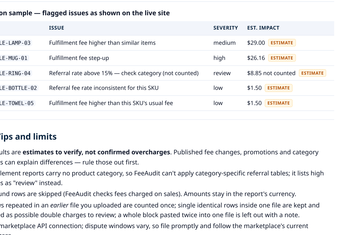

Preview mode with the two sample-report buttons, the marketplace picker and Amazon fee notes

2. **Load the sample Amazon report.** Click **Load sample Amazon report**. Marketplace is auto-detected (or pick Amazon / Walmart Marketplace and the Amazon store yourself).
3. **Read the summary tiles.** On the sample: potential recovery **$58.16** ESTIMATE , **5** flagged SKUs, highest single issue **$29.00** ESTIMATE , Not counted: 1 item to review ($8.85 if they turn out to be overcharges)

Results on the synthetic Amazon sample (feeaudit-amazon-settlement-v2.txt) — planted discrepancies, not real overcharges

4. **Work through the issue list.** Filter by severity (including **Review (not counted)**) or fee type, search by SKU, and sort by estimated impact. Each row has a suggested action.
5. **Try the Walmart sample.** Click **Load sample Walmart Marketplace report**: potential recovery **$13.80** ESTIMATE across **3** flagged SKUs. Not counted: 1 item to review ($9.79 if they turn out to be overcharges)

Results on the synthetic Walmart Marketplace sample (feeaudit-walmart-reconciliation.csv)

6. **With a subscription:** drop in your own report and click **Export flagged issues CSV** (SKUs, order IDs, dates and details) to contact with a case.

4 How to read the results

ITEM	WHAT IT MEANS
Potential recovery ESTIMATE	Sum of *counted* issues only. Estimated impact = (fee charged − expected fee) × units in your report. Expected fee = the SKU's earlier or usual fee, or the median for similar-priced SKUs.
Severity	**high** / **medium** / **low** by size of the estimated impact; **review** = listed for you to check but *not* added to the recovery total.
Review items	Referral rates above the standard rate (15% on most categories), referral-rate step-ups, the possible holiday peak part of Amazon fulfillment step-ups (estimated from Amazon's peak rate cards for the US, UK and Germany, approximated for Canada, and not applied for India, Mexico or Brazil), possible double charges, and SKUs with too few orders (fewer than 5). These often have legitimate explanations.
Suggested action	A next step, e.g. check the SKU in Seller Central's Fee Preview or Walmart Seller Center, and open a case if the recorded dimensions, weight or category are wrong.

Amazon sample — flagged issues as shown on the live site

SKU	ISSUE	SEVERITY	EST. IMPACT
`SAMPLE-LAMP-03`	Fulfillment fee higher than similar items	medium	$29.00 ESTIMATE
`SAMPLE-MUG-01`	Fulfillment fee step-up	high	$26.16 ESTIMATE
`SAMPLE-RING-04`	Referral rate above 15% — check category (not counted)	review	$8.85 not counted ESTIMATE
`SAMPLE-BOTTLE-02`	Referral fee rate inconsistent for this SKU	low	$1.50 ESTIMATE
`SAMPLE-TOWEL-05`	Fulfillment fee higher than this SKU's usual fee	low	$1.50 ESTIMATE

5 Tips and limits

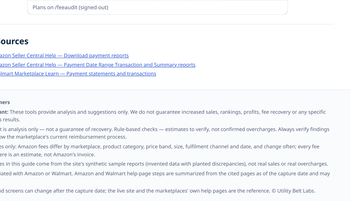

- Results are **estimates to verify, not confirmed overcharges**. Published fee changes, promotions and category rules can explain differences — rule those out first.
- Settlement reports carry no product category, so FeeAudit can't apply category-specific referral tables; it lists high rates as "review" instead.
- Refund rows are skipped (FeeAudit checks fees charged on sales). Amounts stay in the report's currency.
- Rows repeated in an *earlier* file you uploaded are counted once; single identical rows inside one file are kept and listed as possible double charges to review; a whole block pasted twice into one file is treated as a duplicate.
- No marketplace API connection; dispute windows vary, so file promptly and follow the marketplace's current process.
- Fee notes on the page are dated summaries of public fee pages and vary by category — confirm in Seller Central.

6 Pricing

FeeAudit.com.co own	Utility Belt Labs Full Suite
$14.99/month	**$34.99**/month
Amazon & Walmart fee discrepancy flags, per-SKU estimated recovery, CSV export for cases.	All four tools: ListWise Pro, MarginGuard Pro, FeeAudit and ClearRank SEO (including Reviews & Reputation).

Prices are in US dollars and billed in USD whichever marketplace you sell on; they exclude any applicable tax. Cancel anytime from the billing portal. Prices as shown on Oct 29, 2026.

Anyone can preview FeeAudit on the sample reports without an account.

Disclaimers

Important: These tools provide analysis and suggestions only. We do not guarantee increased sales, rankings, profits, fee recovery or any specific business results.

FeeAudit is analysis only — not a guarantee of recovery. Rule-based checks — estimates to verify, not confirmed overcharges. Always verify findings and follow the marketplace's current reimbursement process.

Estimates only: Amazon fees differ by marketplace, product category, price band, size, fulfillment channel and date, and change often; every fee figure here is an estimate, not Amazon's invoice.

All figures in this guide come from the synthetic sample reports contained with planted discrepancies, not real sales or real overcharges.

Not affiliated with Amazon or Walmart. Amazon and Walmart help-page steps are summarized from the cited pages as of the capture date and may change.

Steps and screens can change after the capture date; the live site and the marketplaces' own help pages are the reference. © Utility Belt Labs.
